

FME Desktop Advanced Training

Overview

Learn from the experts in how to exploit the most commonly used advanced components and capabilities in FME through this course, which includes extensive hands-on, problem-solving exercises.

Learning Objectives

- Make use of user parameters, controlling the input using advanced settings
- Analyze and deconstruct an FME log file
- Understand potential methods for improving FME performance
- Create, edit and re-use a custom transformer
- Incorporate advanced methods for reading and writing datasets (dynamic workspaces, fanouts, etc.)
- Construct attributes with the text and arithmetic editors
- Understand when and how to apply conditional attribute values

Course Outline

Welcome to Safe Software

- Course Overview
- FME Version and Sample Data
- Introductions

Advanced Parameter Use

- FME Parameters
- User Parameters
- Parameter Types
- Linking Parameters
- Shared Parameters
- Parameter Settings
- Parameters and Attributes

Performance Considerations

- Performance and FME
- 64-bit FME
- Log file Interpretation
- Reader and Writer Optimization
- Transformer Optimization
- Database Optimization
- Parallel Processing
- Server and Cloud Performance

Custom Transformers

- Creating Custom Transformers
- Input and Output Ports
- Schema Handling
- Custom Transformer Types
- Creating Linked Transformers
- Switching Transformer Types
- Custom Transformer Versioning
- Parallel Processing
- Looping

Advanced Readers and Writers

- Zip File Handling
- Web-Based Datasets
- Fanouts
- Generic Reader and Writer
- Dynamic Translations
- Dynamic Schema Handling
- Advanced Dynamic Schemas

Advanced Attribute Handling

- Constructing Values
- Editor Dialogs
- FME Functions
- Conditional Values
- Multiple Feature Attributes
- Null Attributes

Exercises:

- Creation and Use of Complex Parameters
- Analyzing and Improving Workspace Performance
- Parallel Processing
- Custom Transformers and Loops
- Dynamic Schemas... plus many more
